

About Audientes

Our mission is to make smart, affordable, high-quality hearing aids accessible to everyone who needs them. To that end, we design, develop and bring to market innovative assisted hearing solutions.

Today, half a billion people suffer from disabling hearing loss—and that number will nearly double by 2050. To address this critical global health challenge, Audientes has developed Ven™—an inexpensive, self-fitting, binaural hearing aid that can reintroduce sound into the lives of countless hearing-impaired people.

500 million

people worldwide suffer from disabling hearing loss.

900 million

are estimated to by 2050.

...but only 16 million

hearing aids are sold annually.

Ven™
by audientes

**Smart,
self-fitting,
high-quality
hearing aid**

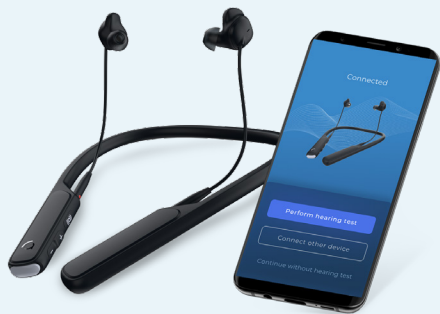

The world's first truly self-fitting hearing aid

Imagine being able to address your hearing loss in just minutes—and from the comfort of your own home. Thanks to Ven, it's never been easier—or more convenient. Because Ven includes a built-in hearing test, it can automatically adapt to your hearing profile. Get ready for crystal-clear audio, natural sounding speech and high-fidelity music. Control and configure your Ven using either the on-device buttons or the Audientes app.

Get started in 3 simple steps

-  Set up quickly and easily
-  Perform hearing test
-  Adjust or adapt when necessary

With its sleek, lightweight Danish design, Ven delivers all-day comfort. A rechargeable battery provides an estimated 12 hours of use. Since Ven is dust, dirt and moisture resistant, it can go all the places you do.

More than a smart hearing aid

-  For disabling hearing loss
-  Binaural (for both ears)
-  Self-fitting
-  NAL-NL2 fitting algorithm
-  Pure-tone audiometry
-  Active noise reduction
-  5 listening programs
-  Bluetooth for TV or mobile connectivity
-  Low purchase & maintenance cost
-  Elegant design
-  Rechargeable battery
-  Feedback reduction
-  Excellent sound quality
-  Extended warranty options

Let the world in.

Designed for those with mild-to-severe hearing loss, Ven combines the sound quality of a high-end hearing aid with the cutting-edge features of next-generation wireless earbuds.

Available without a prescription, it opens a world of sound, experience and human connections to the millions of people around the world who suffer from disabling hearing loss.
